

NOTICE

It is requested that celebrants of Hal-
lowe'en night in the Village of Delia
conduct themselves reasonably and re-
frain from the destruction of Property.

By order of the
Village Council of Delia.

Drive For Aluminum

In order to assist in the building of CANADA'S AIRCRAFT, residents of the Delia District are requested to deposit all VOLUNTARY DONATIONS of ALUMINUM WARE in a box now erected in front of the Bank of Commerce Building, Delia.

THE BOY SCOUTS will make a special canvass of the village, and householders are asked to collect all superfluous and outworn aluminum ware they are willing to donate.

Farm Machinery Sales
Sales of farm implements and equip-

pected to give a yield of from thirty to forty bushels of shelled corn per acre. The yields on irrigated land should be practically double this amount.

Experiments have not been conducted at the Lethbridge Experimental Station in regard to harvesting corn with lambs. Experiments conducted by the late Don Bark, of

that lambs pastured on corn made average daily gain of .27 pounds per day. The average acreage used the five-year period was 7.7 acres is pastured an average of 183

end of this time the lambs were moved and ewes were used to complete the work of harvesting.
